

Linde forklift trucks brake without brakes.

Instead, the Hydrostatic Drive decelerates in a controlled manner, as soon as the driver takes his foot off the accelerator pedal. This mechanism enables precise vehicle control and eliminates brake pad wear. Unlike our competition, which over a 2 year period, generates in excess of 1.5 pounds of particulate matter from brake pad wear alone.

Additional benefits include:

- You'll never do another brake job
- No tire scrubbing, or flat spots on tires
- Four times the tire life vs. the competition
