

Linde is the Only Forklift Manufacture that does NOT use an Automotive Style Transmission

Linde Material Handling

Linde

The same revolutionary “Hydrostatic Drive System” found in today’s Linde forklifts is used in most major heavy construction equipment applications. These include Caterpillar bulldozers and John Deere excavators, to name a few.

Construction Equipment.

Agricultural And Forestry Machines

Material Handling Equipment

Municipal Vehicles

Linde Manufactures the Products that Power the World We Live In.

Linde Material Handling

Linde

Typical applications:

- **Construction equipment**
 - Excavators
 - Bulldozers
 - Track loaders
 - Wheel loaders
 - Road surfacers
- **Agricultural machines**
 - Combine harvesters
 - Forage harvesters
 - Beet/potato harvesters
 - Farm tractors
- **Forestry machinery**
- **Municipal vehicles**
- **Concrete pumping equipment**
- **Shipbuilding/anchor winches**
- **Heavy haul vehicles**
